The Early Career Framework: A Flexible Approach!

Teaching is a wonderful career: meaningful, engaging, and exciting! But it is also complex, busy, and demanding. The demands on all teachers - especially ECTs who are still adjusting to life as a full-time classroom teacher - are significant, and, as an ECF Delivery Partner we do not underestimate this. We understand fully that balancing the demands of your job with completing the ECF programme can be incredibly challenging, and feel overwhelming at times.

However, we believe in the framework's ability to help and support your continued development as a teacher: it will provide ideas, insights, and guidance that will begin to underpin your day-to-day teaching practice; it will build a solid foundation on which you will continue to grow as a teacher; and, most importantly, it will prepare you to have a lasting impact on the pupils in your classroom. It is vital, therefore to remember that, as teachers, we are always learning!

So, how can you ensure that you can engage fully and productively with the programme in the midst of your busy teaching schedule?

Whilst it's fundamental to remember that **ALL** aspects of the Early Career Framework must be covered during your induction, the UCL programme is designed to be flexible. They recommend the following to support a more flexible approach:

What happens if an ECT is struggling to keep up with the programme?

We recognise that sometimes - with the agreement of their headteacher, Induction Tutor and Delivery Partner - an ECT will need a more flexible approach. This may be because they have had a period of enforced absence, or they have been advised by their Appropriate Body to reduce the amount of time they spend on the ECF. Our flexible programme comprises the Reduced Modules Summary Guides for modules 1-5 and recordings of all training events in Year 1. You can find these in the Welcome section of each module (1 -5). We remind you that Year 1 is when ECTs are expected to address all of the ECF statements.

How can we ensure that the programme does not add to ECTs' workload?

We give participants a choice about how they access materials. You may choose to study them online or download a copy. It is also possible to listen to our research and practice summaries rather than read them. There are no assessments or quizzes at the end of self-study sessions, and we encourage participants to tailor the session according to their needs by spending longer on the activities that are more relevant to them and quickly reviewing the ones that are less so. It is as simple as Review/ Tailor/ Tick! You should never go over the hour allocated. This is a busy professional development programme and mentors, and Induction Tutors should monitor their ECTs' engagement to ensure they are keeping up with it, without allowing it to become overly burdensome.

Do ECTs have to complete all the activities in the programme? What if they feel that some are not appropriate for them or they have done them before in their ITE year?

It is a statutory requirement that all ECTs engage in a 2-year programme of professional development based on the Early Career Framework. Therefore, it is important that all participants complete all the activities and engage in all training sessions. The ECF Programme is a generic programme and ECTs should expect to revisit research from their ITE year; however, their focus should be on how they can apply it discerningly to their classrooms, and this certainly will be a new challenge. The Teaching Standards are something that all teachers are expected come back to throughout their career, improving their mastery of them each time. Nevertheless, we do recognise that ECTs on our programme come from different ITE routes, work in a range of contexts and have different strengths and weaknesses. Therefore, we have built flexibility into our programme to make sure participants can tailor each activity to their needs. These are outlined in our Wellbeing Charter where we make 10 pledges to all our participants

How can we control the workload of the mentors?

We have prepared all the mentoring resources, so the mentor does not have to. Reading or listening to the research and practice summaries (about 10 minutes long) and scanning the activities will usually be enough to prepare them for their mentor meeting. Time is built in each half term to the mentor's self-directed study for them to read ahead in the module and identify those areas they, or their ECT, are likely to need to focus more attention on. Induction Tutors should ensure that high-quality mentoring based on the ECF is taking place, and that mentors are themselves engaging in their own professional development.

If you would like more information about how to use the programme flexibly, you can access UCL's [Wellbeing Charter](#), and refer to their [Frequently Asked Questions](#) page for more information.
